Vandaag telt de groep meer dan 1000 medewerkers in 7 verschillende landen. Meer info op [www.jorisode.com](http://www.jorisode.com)

## CERTIFICATION ENGINEER (M/V)

### Responsibility:

Obtain and maintain the product certifications (for panels and/or profiles) required to allow the business to operate in all market segments. These certifications cover product properties as insulation values, reaction and resistance to fire, environmental performance and mechanical properties as span and structural strength. They are obtained through a mix of calculations, internal and 3rd party testing.

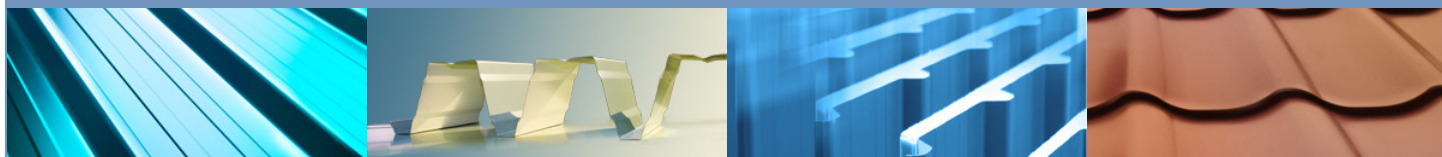

### Specific tasks:

- Contact with external bodies for testing and certification. Mounting samples and testing. Drafting technical files and CAD-drawings. Creating solutions to obtain certifications and/or successful tests. Place orders and approve invoices for external services. (60%)
- Communicate to sales about the certifications and the application for our customers. Provide technical assistance and support for bigger construction jobs the company supplies product into (25%)
- Assist in meetings on Kingspan group level, personal trainings and travel (10%)
- Assist in product audits in our factories. Provide auditors the requested samples, data and statistics regarding the manufactured products. (5%)
- Make a monthly reporting on the progress. This report is reviewed in the monthly R&D Meeting and the monthly Operations Meeting.

### Specific job background:

The certification team consists for Joris Ide Group out of 2 engineers with extensive experience and we are looking to grow the team with 1 (junior) person to be charged with specific projects and terms. This team cooperates with colleagues in other companies belonging to the Kingspan Group doing similar work for their business. The coordination and central R&D centre for Kingspan Group is located in Ireland.

In the panels business, the renowned external bodies for product certification are FM (Factory Mutual), LPCB for the UK, CSTB for France and DIBT for Germany. ATG for Belgium. Warrington Fire (Ghent and UK), KIT (Karlsruhe) and TUD (Darmstadt), PPA Europe and BRE (UK) are frequent technical partners. The most important applicable product norms are EN14782, EN1090, EN14509 (new version for structural to be released EN14509-2), EN508 and EN13501. Increasing important are EN14025 and EN15804 on EPD (Environmental Product Declarations).

## Profile

The title holder likes to work hands-on in a very dynamic environment between desk and the laboratory. He is able to express himself in Dutch, French and English. Strong interest and deep knowledge of metal cladding building applications and product properties are essential in the job. Internal training will be provided but a (civil) engineering background is a prerequisite.

## We're offering:

We offer an exciting and varied job with a competitive salary in a dynamic company that is in full expansion.
